

Gro-Tanks / NFT

The original domestic hydro system, first launched by Nutriculture in 1976.

A constant supply of water and nutrition to the roots combined with unlimited access to oxygen means you can expect up to 4x the yield of traditional soil growing.

Le système hydroponique original à usage domestique, lancé pour la première fois par Nutriculture en 1976.

Grâce à cet apport constant en eau et éléments nutritifs aux racines, associé à un apport illimité d'oxygène, vous pouvez obtenir des rendements jusqu'à quatre fois supérieurs à ceux obtenus par les méthodes de culture traditionnelles.

Das originale Hydrokultursystem für den Heimbereich, das von Nutriculture 1976 auf den Markt gebracht wurde.

Dank einer ständigen Zuführung von Wasser und Nährlösung in Verbindung mit einer unbegrenzten Sauerstoffzufuhr können Sie mit bis zu vier Mal so hohen Erträgen wie bei herkömmlichen Anbaumethoden rechnen.

El sistema hidropónico original de uso doméstico, lanzado por Nutriculture en 1976.

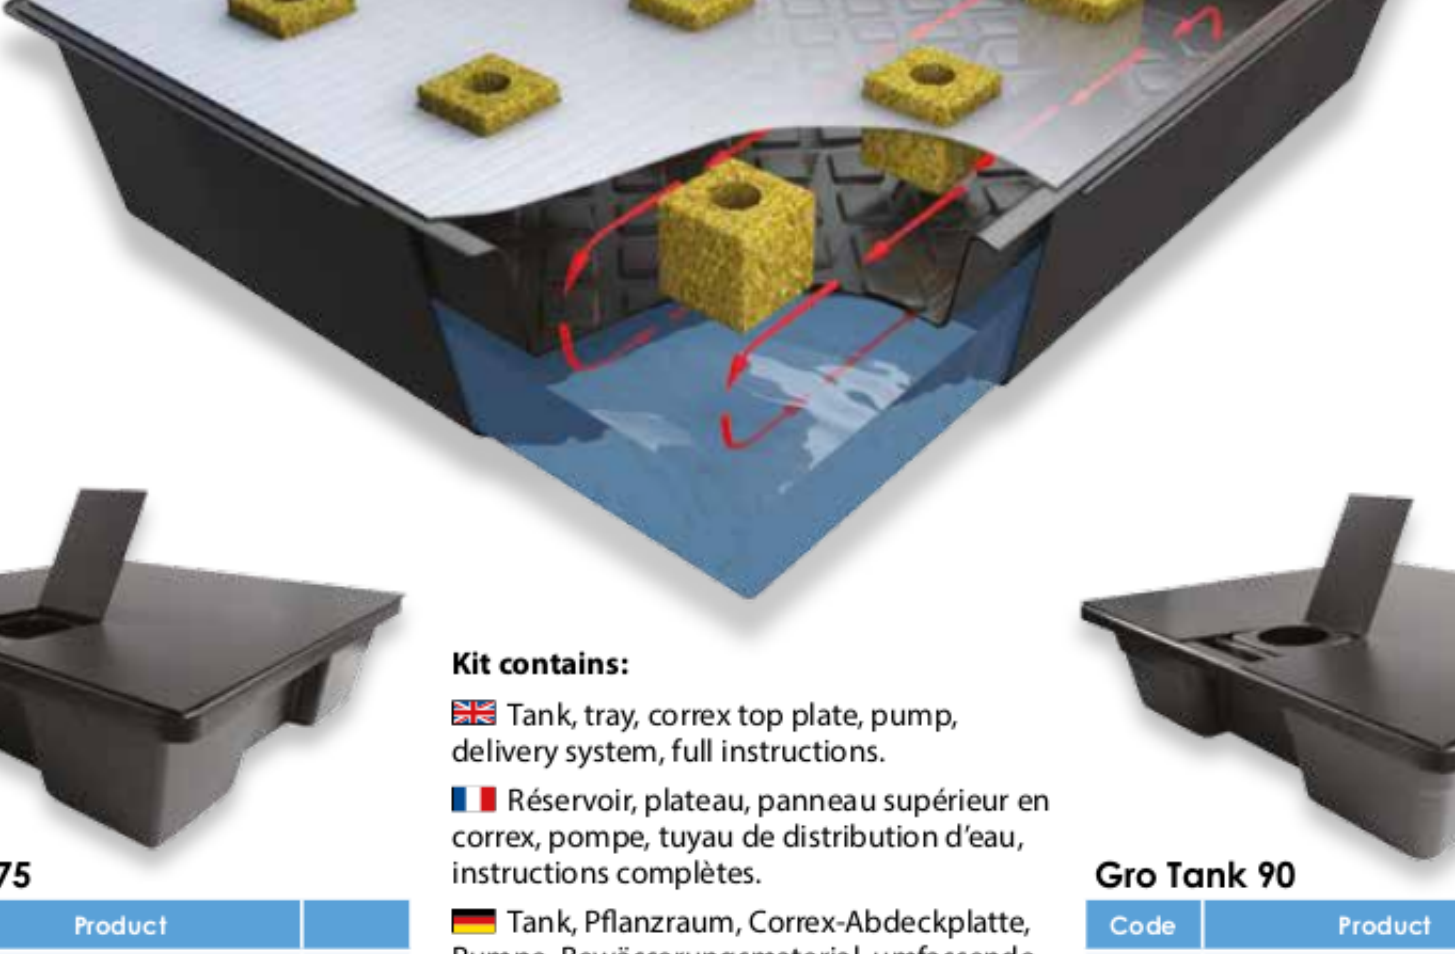

Este suministro constante de agua y nutrición a las raíces, junto con el acceso ilimitado al oxígeno, hace que puede esperar un rendimiento hasta 4 veces más alto que el del cultivo de suelo tradicional.

L'originale sistema idroponico casalingo lanciato per la prima volta da Nutriculture nel 1976.

Una costante somministrazione alle radici di acqua ed elementi nutritivi associata a un accesso illimitato all'ossigeno significa poter contare su un rendimento sino a 4 volte maggiore rispetto a quello ottenuto con la tradizionale coltivazione su suolo.

Originální domácí zavlažovací systém, který společnost Nutriculture poprvé spustila v roce 1976.

Neustálý přísuv vody a živin ke kořinkám společně s neomezeným přístupem kyslíku znamená, že můžete očekávat až 4x větší výnos oproti tradičnímu pěstování v půdě.

Gro Tank 75

NUTRICULTURE SYSTEMS / NFT 3

Multi-Ducts / NFT

Multi-Ducts are high-yielding complete hydroponic growing systems which enable growers to manage a large number of plants from one low-lying integrated reservoir - dramatically up-scaling the number of plants and yield, without increasing workload.

Les Multi-Ducts sont des systèmes complets de culture hydroponique à fort rendement qui permettent aux cultivateurs de gérer un grand nombre de plants à partir d'un réservoir intégré au fond du système, ce qui augmente nettement le nombre de plants et le rendement sans accroître la charge de travail.

Multi-Ducts sind komplette, hydroponische Zuchtssysteme, die hohe Erträge garantieren. Sie ermöglichen Züchtern, eine große Anzahl von Pflanzen durch einen einzigen, tiefliegenden integrierten Tank zu versorgen. Pflanzenanzahl sowie Ertrag lassen sich so erheblich steigern - und das ohne höheren Arbeitsaufwand.

Los Multi-Ducts son sistemas hidropónicos completos de alto rendimiento que permiten que el cultivador gestione un gran número de plantas desde un depósito integrado en la parte baja del sistema. Esto aumenta radicalmente el número de plantas y el rendimiento, sin aumentar la carga de trabajo.

Multi-Duct sono sistemi completi di coltivazione idroponica a resa elevata, che consentono di gestire un gran numero di piante grazie a un serbatoio integrato nella parte inferiore, aumentando in modo significativo il numero di piante e il volume di resa senza influire sul tempo di lavoro richiesto.

Systémy Multi-Duct jsou kompletní hydroponické pěstební systémy s vysokými výnosy, které umožňují pěstitelům ošetřovat velký počet rostlin z jednoho nízko položeného integrovaného zásobníku - čímž prudce vzrůstá počet rostlin a výnosy, aniž by se zvýšila pracovní zátěž.

Kit contains:

Tank, correx top plate, pump, delivery system, spreader mat, channel stand(s), test kit, tank cover, full instructions.

Réservoir, panneau supérieur en correx, pompe, tuyau de distribution d'eau, manta de riego, supports, kit de prépreuve, couvercle du réservoir, instructions complètes.

Tank, Correx, Correx-Abdeckplatte, Pumpe, Bewässerungsmaterial, Verteilermatte, Stützen, Test-Kit, Tankabdeckung, umfassende Bedienungsanleitung.

Tanque, placa superior en correx, bomba, sistema de distribución, manta de riego, soportes, kit de prueba, tapa para el tanque, instrucciones completas.

Seratoio, piastra superiore correx, pompa, sistema di spedizione, telo drenante, canale, supporti, kit di prova, copercchio del serbatoio, istruzioni complete.

Nádrž, horní táč correx, čerpadlo, distribuční systém, testovací sada, kryt nádrže, kompletní návod k použití.

A Practical Guide to NFT

Code	Product
BK101	A Practical Guide to NFT

- Automatická závlaha bez časovače
- Proxázané výsledky - dosahujete až 4x vyšších výnosů než při běžných metodách pěstování
- Velmi málo použitého substrátu - menší riziko onemocnění, méně odpadu, který musíte likvidovat
- Gro-Tanks se dodávají v 6 velikostech
